Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance: Although Childers et al. teaches the use of a gas for "flushing" a sterilization chamber after the contents have been exposed to a sterilizing gas, the "flushing" step of Childers et al. must take place when the sterilizing gas is within the sterilization chamber since the "flushing" step is designed to drive sterilant gas into closed or open ended lumens. All of the instant independent claims now require that the step of flushing occurs after a vacuum has been applied to the chamber to remove the sterilant therefrom. Thus, there would have been no motivation or suggestion to combine Robitaille et al. with Childers et al. since the claims require that the flushing step occur after all of the sterilant has been removed from the chamber of Robitaille et al. and Childers et al. teaches only flushing when sterilant is still within the chamber. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to ELIZABETH L. MCKANE whose telephone number is (571)272-1275. The examiner can normally be reached on Mon-Fri; 5:30 a.m. - 2:00 p.m..
